INDEX OF AUTHORS — VOLUME 5

A

ALIBERT, J. *See* Fain-Maurel, Cassier and Alibert, 603
ANDERSON, M. *See* Smith, del Castillo and Anderson, 281
ARNOTT, H. J. and HARRIS, J. B. Development of chloroplast substructures with apparent secretory roles in the young tobacco leaf, 337
ARNOTT, H. J. *See* HARRIS and ARNOTT, 527
ASH, J. F. *See* SPOONER; ASH, WRENN, FRATER and WESSELLS, 37

B

BEDINI, C., FERRERO, E. and LANFRANCHI, A. The ultrastructure of ciliary sensory cells of two turbellaria acoela, 359
BELL, A. *See* BORG, BELL and PICARD, 259
BIBB, C. and CAMPBELL, R. D. Tissue healing and septate desmosome formation in hydra, 23
BIBB, C. and CAMPBELL, R. D. Cell affinity determining heterospecific graft intolerance in hydra, 199
BIESELE, J. J. *See* MULLINS and BIESELE, 47
BORG, T. K., BELL, R. A. and PICARD, D. J. Ultrastructure of neurosecretory cells in the frontal ganglion of the tobacco hornworm, *Manduca sexta* (L). 259
BOULIGAND, Y. *See* GINNEKEN and BOULIGAND, 413
BYRAM, J. E. and FISHER, F. M. The absorptive surface of *Moniliformis dubius* (Acanthocephala) I. Fine structure, 553

C

CAMPBELL, R. D. *See* BIBB and CAMPBELL, 23, 199
CASSIER, P. *See* FAIN-MAUREL, CASSIER and ALIBERT, 603
CASTILLO, J. *See* SMITH, DEL CASTILLO and ANDERSON, 281
CHAN, J. *See* WRIGHT and CHAN, 373
CHET, I. and KISLEV, N. Scanning electron microscopy of spherules of *Physarum polycephalum*, 545
CHET, I. *See* KISLEV and CHET, 349
CHEUNG, W. W. K. and MARSHALL, A. T. Studies on water and ion transport in homopteran insects: Ultrastructure and cytochemistry of the cicadoid and cercopoid midgut, 651
CHEUNG, W. W. K. *See* MARSHALL and CHEUNG, 671
CHU-WANG, I. *See* FOELIX and CHU-WANG, 451, 461
CLARK, W. H. *See* DEWEL and CLARK, 133, 147, 161

D

DAVEY, K. G. *See* TOBE, DAVEY and HUEBNER, 633
DELACHAMBRE, J. L'ultrastructure des glandes dermiques de *Tenebrio molitor* L. (Insecta, Coleoptera), 243
DEWEL, R. A. and CLARK, W. H. Studies on the tardigrades. I. Fine structure of the anterior foregut of *Milnesium tardigradum* Doyère, 133
—. Studies on the tardigrades. II. Fine structure of the pharynx of *Milnesium tardigradum* Doyère, 147
—. Studies on the tardigrades. III. Fine structure of the esophagus of *Milnesium tardigradum* Doyère, 161

E

ERNST, V. V. The digital pads of the tree frog, *Hyla cinerea*. I. The epidermis, 83
—. The digital pads of the tree frog, *Hyla cinerea*. II. The mucous glands, 97

F

FAIN-MAUREL, M-A., CASSIER, P. and ALIBERT, J. Etude infrastructurale et cytochimique de l'intestine moyen de *Petrobius maritimus* Leach en rapport avec ses fonctions excretrice et digestive, 603
FARLEY, R. D. *See* HAWKE, FARLEY and GREANY, 171
FERRERO, E. *See* BEDINI, FERRERO and LANFRANCHI, 359
FISHER, F. M. *See* BYRAM and FISHER, 553
FOELIX, R. E. and CHU-WANG, I. The morphology of spider sensilla. I. Mechanoreceptors, 451
—. The morphology of spider sensilla. II. Chemoreceptors, 461
FRATER, R. B. *See* SPOONER, ASH, WRENN, FRATER and WESSELLS, 37

INDEX OF SUBJECTS

A

Absorption, of ferritin, by cells of the digestive gland in *Nassarius tegula* (Gastropoda: Prosobranchia), EM study, 585
Absorptive surface, of *Moniliformis dubius* (Acanthocephala), EM study, 553
Acanthocephala, *Moniliformis dubius*, the absorptive surface of, EM study, 553
Ameloblasts, fine structure of Tome's process of, and its relationship to the elaboration of enamel, EM study, 501
Annelid, muscle, with the longest recorded sarcomere, light microscopic, SEM and EM study, 281
Antenna, of culicine mosquitoes, fine structure of sensilla coeloconica of, SEM and EM study, 105
Arachnid, *Ciniflo*, chemoreceptor sensilla in, EM study, 679

B

Brain, of crayfish, sensory interneurones, physiology and related structural significance of two cells in, physiological and light microscopic study, 393

C

Cell affinity, determining heterospecific graft intolerance in hydra, light and EM study, 199
Cell and morphogenetic movements, heavy meromyosin binding to microfilaments involved in, EM study, 37
Cell division, cytokinetic activities in a human cell line, the midbody and intercellular bridge, light microscopic study, 47
Cell dynamics, in the olfactory mucosa, EM study 113
Cellulose acetate paper, electron microscopy of endothelial cells collected on, light microscopic and EM study, 333
Chemoreceptor sensilla, in *Ciniflo* (Araneida, Arachnuda), EM study, 679
Chemoreceptors, of spider, EM study, 461
Chloroplast substructures, with apparent secretory roles, development of, in tobacco leaf, EM study, 337
Chloroplasts, of tobacco leaf, effects of senescence on, EM study, 527
Ciliary sensory cells, of two turbellaria acoela, EM study, 359
Copepod, *Cletocampus retrogressus*, cuticular ultrastructure of, 413
Crayfish, brain, sensory interneurones: some observations concerning the physiology and related structural significance of two cells in, physiological and light microscopic study, 393
Cuticle, of copepod crustacean *Cletocampus retrogressus*, EM study, 413
Cytochalasin D, effects of on differentiating muscle in culture, light microscopic, SEM and EM study
Cytokinesis, in a human cell line: the midbody and intercellular bridge, light microscopic study, 47

D

Dendrites, of an insect olfactory receptor, vesicular structures in, EM study, 23
Desmosome, septate, formation, and tissue healing in hydra, light microscopic and EM study, 2

E

Ecdysial droplets, and the ecdysial membrane, formation of, in an insect, EM study, 441
Echinoderm, *Comanthus japonica*, fine structure of fertilization membrane of, 209
Enamel, elaboration of, in rat incisor ameloblasts, EM study, 501
Endothelial cells, electron microscopy of, collected on cellulose acetate paper, light microscopic and EM study, 333
Epidermis, of digital pads of the tree frog, *Hyla cinerea*, EM study, 83
Esophagus, of tardigrade Milnesium tardigradum, EM study, 161
Eye, the fine structure of the retina in the Japanese quail. I. Pigment epithelium and its vascular barrier, 489

F

Fat body, of tsetse fly *Glossina austeni*, 633
Ferritin, absorption of, by cells of the digestive gland of *Nassarius tegula*, EM study, 585
Fertilization membrane, fine structure of, in the feather star *Comanthus japonica* (Echinodermata: Crinoidea), light microscopic, SEM and EM study, 209

Freeze-etched spores, of *Nosema apis*, EM study, 315
Freeze-etching, studies on ultrastructural changes in the spermatid nuclear envelope of *Periplaneta americana* during spermiogenesis, EM study, 323
Frog, tree, *Hyla cinerea*, digital pads of. I. The epidermis, EM study, 83
—. II. The mucous glands, EM study, 97

G

Ganglion, frontal, of tobacco hornworm, neurosecretory cells in, 259
Ganglia, cephalic, of *Octopus vulgaris*, localisation of biogenic monoamines in, histochemical study, 591
Gerbil, Mongolian, intranuclear inclusions in mammotrophs of, EM study, 697
Gland, digestive, of gastropod, absorption of ferritin by, EM study, 585
—s, dermal, of *Tenebrio molitor* (Insecta, Coleoptera), SEM and EM study, 243
—s, mucous, of digital pads of the tree frog *Hyla cinerea*, EM study, 97
—s, pygidial, of *Bledius mandibularis* (Coleoptera: Staphylinidae), light microscopic and EM study, 215
Glossina austeni, nutrient transfer during the reproductive cycle in. I. Histology and histochemistry of the milk gland, fat body and oenocytes, 633
Graft intolerance, cell affinity determining, in hydra, light and EM study, 199
Grandry corpuscle, perinuclear organelles of, ultrastructure and development, 269
Gut, fore-, of a nemertine, *Lineus ruber*, EM study, 697
—, fore-, of a tardigrade, *Milnesium tardigradum*, EM study, 133
—, hind-, of insect, water and ion transport in, EM study, 671
—, mid-, of insect, water and ion transport in, EM study, 651
—, mid-, of *Petrobius maritimus*, excretory and digestive functions of, histochemical and EM study, 603

H

Hydra, cell affinity determining heterospecific graft intolerance in, light and EM study, 199
—, tissue healing and septate desmosome formation in, light microscopic and EM study, 23

I

Innervation, and fine structure, of an annelid muscle, light microscopic, SEM and EM study, 281
Insect, *Bledius mandibularis* (Coleoptera: Staphylinidae), fine structure of the pygidial glands of, light microscopic and EM study, 215
—, formation of the ecdysial droplets and the ecdysial membrane in, EM study, 441
—, culicine mosquitoes, fine structure of antennal sensilla coeloconica of, 105
—, homopteran, water and ion transport in hindgut of, 671
—, homopteran, water and ion transport in midgut of, 651
—, *Manduca sexta*, ultrastructure of neurosecretory cells in the frontal ganglion of the tobacco hornworm, EM study, 259
—, olfactory receptor, vesicular structures in the dendrites of, EM study, 233
—, *Orgilus lepidus*, fine structure of sense organs in the ovipositor of, 171
—, *Petrobius maritimus*, mid-gut of, excretory and digestive functions, histochemical and EM study, 603
—, *Tenebrio molitor*, ultrastructure of dermal glands of, 243
Insects, bees (Apoidea, Megachilidae), SEM evidence for morphogenetic fields in legs of, 63
—, *Periplaneta americana* and *Schistocerca gregaria*, the ultrastructure of peripheral nerves in, 703
Intercellular bridge, and midbody, cytokinetic activities in a human cell line, light microscopic study, 47
Interneurones, sensory, some observations concerning the physiology and related structural significance of two cells in the crayfish brain, physiological and light microscopic study, 393
Intestine, mid, of *Petrobius maritimus*, EM and histochemical study in relation to excretory and digestive function, 603
Ion, and water transport, in homopteran hindgut, 671
—, —, in homopteran midgut, 651
Iridophores, in the skin of the Atlantic salmon *Salmo salar*, EM study, 479

K

Keratin, alpha, of porcupine quill tip, demonstration of rotational symmetries in, EM study, 185

M

Mammotrophs, of the Mongolian gerbil, the effect of dihydrotestosterone or testosterone in combination with ovariectomy on, EM study, 697
Mechanoreceptors, of spider, EM study, 451
Membrane, ecdysial, formation of and ecdysial droplets, in an insect, EM study, 441
—, fertilization, fine structure of, in the feather star *Comanthus japonicus* (Echinodermata: Crinoidea), light microscopic, SEM and EM study, 209
—, silicone rubber, as a support for long-term cultivation and electron microscopic processing of nervous tissue, light microscopic and EM study, 691
Meromyosin, heavy, binding to microfilaments involved in cell and morphogenetic movements, EM study, 37
Microfibrils, of porcupine quill tip, demonstration of rotational symmetries in alpha-keratin, EM study, 185

Microfilaments, heavy meromyosin binding to, involved in cell and morphogenetic movements, EM study, 37
Microspikes, of growing nerve cells, orientational preference shown by, light microscopic and EM study, 401
Milk gland, of tsetse fly *Glossina austeni*, 633
Mollusc, *Nassarius tegula* (Gastropoda: Prosobranchia), absorption of ferritin by cells of the digestive gland of, EM study, 585
—, *Octopus vulgaris*, histochemical localisation of biogenic monoamines in the cephalic ganglia of, 591
Molting, the formation of the ecdysial droplets and the ecdysial membrane in an insect, EM study, 441
Moniliformis dubius, the absorptive surface of, EM study, 553
Monoamines, biogenic, histochemical localisation of, in cephalic ganglia of *Octopus vulgaris*, 591
Morphogenetic fields, SEM evidence for, in legs of bees, 63
Mucosa, olfactory, cell dynamics in, EM study, 113
Mucous glands, of digital pads of the tree frog *Hyla cinerea*, EM study, 97
Muscle, annelid, fine structure and innervation of, with the longest recorded sarcomere, light microscopic, SEM and EM study, 281
—, differentiating, the effects of cytochalasin D on, light microscopic, SEM and EM study, 1
Myxomycete, *Physarum polycephalum*, SEM study of spherules of, 545
—, —, SEM study of sporulating cultures of, 349

N

Nematodes, trichuroid, sense receptors in the bacillary band of, EM study, 373
Nemertine, *Lineus ruber*, structure of the fore-gut of, EM study, 381
Nerve cells, orientational preference shown by microspikes of, *in vitro*, light microscopic and EM study, 401
Nervous system, cephalic ganglia, of *Octopus vulgaris*, localisation of biogenic monoamines in, histochemical study, 591
— —, morphology of spider chemoreceptors, EM study, 461, 451
— —, neurosecretory cells, in frontal ganglion, EM study, 259
— —, peripheral, in two insect species, EM study, 703
— —, sense receptors in the bacillary band of trichuroid nematodes, EM study, 373
— —, sensory, antennal sensilla coeloconica of culicine mosquitoes, EM study, 105
— —, sensory, ciliary cells of two turbellaria acoela, EM study, 359
— —, sensory, dendrites of an insect olfactory receptor, EM study, 233
— —, sensory interneurones, physiology and related structural significance of two cells in the crayfish brain, 393
— —, sensory, organs in the ovipositor of the parasitic wasp, *Orgilus lepidus*, EM study, 17
— —, sensory, perinuclear organelles of the Grandry corpuscle, EM study, 269
— —, sensory, ultrastructure of chemoreceptor sensilla in *Ciniflo* (Araneida, Arachnida), 679
— —, tissue culture of, silicone rubber membrane as a support for, light microscopic and EM study, 691
Neurosecretory cells, in the frontal ganglion of the tobacco hornworm, *Manduca sexta*, EM study, 259
Nosema apis, observations on the spore of, SEM study, 581
— —, the fine structure of frozen-etched spores of, 315
Nuclear envelope, spermatid, of *Periplaneta americana*, ultrastructural changes during spermiogenesis in, EM study, 327
Nucleus, intranuclear inclusions, in mammotrophs of the Mongolian gerbil, EM study, 697

O

Oenocytes, of tsetse fly *Glossina austeni*, 633
Olfactory mucosa, cell dynamics in, EM study, 113
Ovariectomy, the effect of dihydrotestosterone or testosterone in combination with, on intranuclear inclusions, in mammotrophs of the Mongolian gerbil, EM study, 697

P

Perinuclear organelles, of sensory Grandry corpuscle, ultrastructure and development, EM study, 269
Petrobius maritimus, mid-gut of, excretory and digestive functions, histochemical and EM study, 603
Pharynx, of tardigrade *Milnesium tardigradum*, EM study, 147
Physarum polycephalum, SEM study of spherules of, 545
— —, SEM study of sporulating cultures of, 349
Pigment epithelium, and its vascular barrier: fine structure of the retina in the Japanese quail, 489

R

Rat, incisor ameloblasts, fine structure of Tome's process of, and its relationship to the elaboration of enamel, 501
Reproductive cycle, nutrient transfer during, in *Glossina austeni*, 633
Retina, in the Japanese quail *Coturnix coturnix japonica*. I. Pigment epithelium and its vascular barrier, EM study, 489

S

Salamander, *Manculus quadridigitatus*, the ultrastructure of secretion in the spermatheca of, light microscopic and EM study, 303
Salmon, Atlantic, *Salmo salar*, fine structure of iridophores in the skin of, 479
Sarcomere, longest recorded, in an annelid muscle, light microscopic, SEM and EM study, 281

Scanning electron microscopy, evidence for morphogenetic fields in hairs of legs of bees (Apoidea, Megachilidae) obtained by, 63
— —, of spherules of *Physarum polycephalum*, 545
— —, of spore of *Nosema apis*, 581
— —, of sporulating cultures of *Physarum polycephalum*, 349
Secretion, ultrastructure of, in the spermatheca of the salamander *Manculus quadridigitatus*, light microscopic and EM study, 303
Secretory roles, of chloroplast substructures, in tobacco leaf, EM study, 337
Senescence, effects of, on chloroplasts of tobacco leaf, 527
Sense organs, in the ovipositor of the parasitic wasp *Orgilus lepidus*, EM study, 171
—, receptors, in the bacillary band of trichuroid nematodes, EM study, 373
Sensilla, chemosensory, ultrastructure of in *Ciniflo*, (Araneida, Arachnida), 679
—, coeloconica, antennal, of culicine mosquitoes, EM study, 105
—, spider, morphology of. II. Chemoreceptors, EM study, 461
—, —, —. I. Mechanoreceptors, EM study, 451
Septate desmosome, formation, and tissue healing in hydra, light microscopic and EM study, 23
Silicone rubber, membrane, as a support for long-term cultivation and electron microscopic processing of nervous tissue, light microscopic and EM study, 691
Skin, of Atlantic salmon *Salmo salar*, iridophores in, EM study, 479
Slime mold, *Physarum polycephalum*, SEM study of spherules of, 545
— —, — —, SEM study of sporulating cultures of, 349
Spermatheca, of salamander *Manculus polycephalum*, ultrastructure of secretion in, light microscopic and EM study, 303
Spermiogenesis, ultrastructural changes in the spermatid nuclear envelope of *Periplaneta americana* during, 323
Spherules, of *Physarum polycephalum*, SEM study of, 545
Spider, chemoreceptors in, EM study, 461, 679
Spore, of *Nosema apis*, frozen-etched, the fine structure of, 315
Sporulating cultures, of *Physarum polycephalum*, SEM study of, 349
Steroids, dihydrotestosterone or testosterone, effect of intranuclear inclusions in mammotrophs of the Mongolian gerbil, EM study, 697
Symmetries, rotational, in alpha-keratin microfibrils, of porcupine quill tip, EM study, 185

T

Tardigrade, *Milnesium tardigradum*. I. Fine structure of the anterior foregut, 133
—, *Milnesium tardigradum*. II. Fine structure of the pharynx, 147
—, *Milnesium tardigradum*. III. Fine structure of the esophagus, 161
Tissue culture, cytokinetic activities in a human cell line, light microscopic study, 47
— —, of nervous tissue, silicone rubber membrane as a support for, light microscopic and EM study, 691
— —, orientational preference shown by microspikes of growing nerve cells *in vitro*, light microscopic and EM study, 401
Tobacco leaf, chloroplast substructures with apparent secretory roles in, development of, EM study, 337
— —, chloroplasts of, effects of senescence on, EM study, 527
Tomes' process, of rat incisor ameloblasts and its relationship to the elaboration of enamel, EM study, 501
Transport, of water and ions, in homopteran insects: ultrastructure and cytochemistry of the cicadoid and cercopoid hindgut, 671
—, of water and ions, in homopteran insects: ultrastructure and cytochemistry of the cicadoid and cercopoid midgut, 651
Turbellaria, acoela, ultrastructure of ciliary sensory cells of, EM study, 359

V

Vesicular structures, in the dendrites of an insect olfactory receptor, EM study, 233

W

Water, and ion transport, in homopteran hindgut, 671
—, —, in homopteran midgut, 651
